# ABOUT

## Mission

*Committed to improving community's health and serving the ailing humanity with passion*

## **Core Values**

**Unity:** *We work together to achieve our goals.*

**Passion:** *We are committed to improving community's health and caring for the sick.*

**Integrity:** *We act with transparency, honesty and fairness in all we do.*

**Excellence:** *We seek to provide high quality clinical care.*

## Our Goals

*Murshid Hospital and Health Care Centre's goal is to provide health-care facilities and awareness in line with medical standards to the surrounding marginalized population.*

## Our Belief

*We believe that health-care is a fundamental human right and should be available to anyone and everyone, either affordable or free of cost. Therefore none of the patient is turned away from our hospital or asked to pay for our services if they cannot. They are treated free with dignity through funds of Patient Welfare Association (PWA).*

## Our Objective

*The objective of the organization is to address the healthcare needs of the surrounding under privileged localities and communities who do not have access to proper medical facilities. The organization through its efficient and affordable out-patient and in-patient program is trying to address the needs of these people from the suburban areas. The hospital has skilled staff and departments with necessary equipment to meet the treatment needs of these communities.*

# PATIENTS WELFARE ASSOCIATION

Murshid Hospital & Health Care Centre (MH&HCC) was established in 1987, a project of M/s. Darut Tasnif (Pvt) Ltd. The Not-For Profit facility provides free medical treatment to the poor and non-affording patients living in the vicinity especially in Karachi as well as all over Pakistan. MH&HCC-PWA is striving hard to provide medical treatment in the society of poor & non-affording patients with the financial assistance of donors/ philanthropists.

PWA is a registered body with the Government of Sindh (Reg. No. DSW (112)-K dated September 17, 1986) and managed by Senior Members of the Hospital. The accounts of PWA are properly maintained and audited every year.

**Free Camps PWA:** PWA has also been holding regular free camps for Eye, T.B & medical patients in general. Insha Allah this exercise of "Community health service" will be continued as a part of PWA activities this year also.

**PWA Clinic:** Murshid hospital & health care centre is also providing medical treatment to poor patients through a welfare clinic which remains open daily from 09:00 am to 1:00 pm. A nominal amount is charged to the patients and the remaining amount is borne by P.W.A. Those who cannot afford to pay even this nominal amount are treated without any charges. During the last year 3345 patients received treatment from this clinic.

**TB & Diabetic Clinic:** The hospital is also providing medical check-ups and treatment for poor and non-affording patients of TB & Diabetic from 09:00 am to 01:00 pm daily at nominal cost and the remaining cost is borne by P.W.A.

**PEP Clinic for Dog Bite:** Murshid Hospital & Health Care Centre has established a post-exposure prophylaxis center for prevention of rabies. Rabies is a deadly, yet preventable disease which usually spreads through bite of rabid dogs. This center has provided free/subsidized vaccination for rabies to more than hundred victims. The center thus incurs expenses to the tune of Rs. 0.5m 1m per annum for saving the underprivileged victims from the menace of rabies. The 117 patients were treated through P.W.A Dog bite victims in the financial year 2017.

**Vesicovaginal Fistula Project:** Murshid hospital & health care center has started (VVF) Vesico vaginal fistula project in collaboration with JANUM from the financial year 2012-13 in order to help improve maternal and newborn survival and health in Pakistan. Under the project, MHHCC has become a fistula repair Centre and is providing free of cost medical treatment including transportation and accommodation for the attendant under financial support of Janum, Direct Relief International and Fistula Foundation. MHHCC is also conducting awareness sessions; holding free medical camps of Fistula in nearby cities of Baluchistan & Sind province; providing informative material to social workers, local clinics & Tertiary care Hospitals; holding meetings with DHO, community health workers & supervisors and training traditional midwives & Dais regarding antenatal care & referral of suspected cases.
